SUMMARY

Web developer and cloud engineer with production experience across full-stack development, AWS and Cloudflare infrastructure, and applied AI. Shipped a production RAG chatbot on AWS Bedrock, resolved a live cloud infrastructure outage, and build custom websites for local businesses in Grande Prairie. Comfortable owning a project end to end: architecture, cost and trade-off decisions, and delivery. Background in mechanical engineering.

TECHNICAL SKILLS

Cloud / Infra	AWS (EC2, S3, RDS, Bedrock, IAM), Cloudflare (Pages, Workers, R2, D1, DNS, CDN), Supabase (Postgres, Auth, RLS, Edge Functions, Storage)
AI	RAG pipelines, AWS Bedrock Knowledge Bases, Titan embeddings, Claude / LLM API integration, prompt engineering
Frontend	React, Vue.js, TypeScript, JavaScript, HTML, CSS / Sass, Tailwind CSS, Vite
Backend / Data	Node.js, Python, SQL, Deno (Edge Functions), serverless functions
E-commerce / Marketing	Shopify (Liquid theme development), Mailchimp, SEO, email marketing, analytics
Tools	Git / GitHub, Bash / CLI, Linux, Docker

EXPERIENCE

Web Developer & Cloud Infrastructure Specialist

Mar 2025 – Present

Interior Offroad Equipment Ltd. (ior.ca) · Alberta, Canada

- Architected and shipped a production RAG chatbot using AWS Bedrock Knowledge Bases, Titan embeddings and Claude, letting customers self-serve product questions with answers grounded in company documents and cited sources.
- Restored the live site the same day after Supabase restricted it for exceeding its storage bandwidth quota, then traced and fixed the root cause.
- Planned and executed a zero-downtime migration of image and PDF storage to Cloudflare R2, compressing 459 production assets by 51% (346 MB → 170.6 MB) and eliminating a recurring infrastructure cost.
- Built a role-based admin CMS (React, TypeScript, Supabase Auth, Row-Level Security, Edge Functions) with branch-level manager permissions, giving non-technical staff full CRUD control over products, team profiles, gallery, promotions and weekly specials without developer involvement.
- Own the site's infrastructure end to end: Supabase (database, auth, storage, RLS, edge functions) and Cloudflare (DNS, CDN, caching, R2).
- Run Mailchimp email marketing campaigns (audience segmentation, A/B testing), SEO and social content, using analytics to guide site and campaign changes.

Shopify Web Developer (Part-time)

Feb 2026 – Present

Edward's Factory Outlet Ltd. (edwardsfactory.ca) · Alberta, Canada · Remote

- Build and maintain the company's Shopify store, developing custom theme sections in Liquid in place of an off-the-shelf template.
- Structured the store around the outlet's menswear, workwear and footwear collections for easy browsing and checkout.

Freelance Web Developer

May 2026 – Present

Self-employed · Grande Prairie, AB

- **GP Storage Solutions** (gpstoragesolutions.ca): hand-coded HTML/CSS site with no framework for near-instant loads, local SEO and sitemap, deployed on Cloudflare.
- **SK Lighting Solutions** (sklightingsolutions.ca): custom Vite website built for lead generation, with clear service pages and quote requests.
- **simretpaulos.com**: personal portfolio in Vue.js on Cloudflare Pages, with a serverless contact form (Pages Functions, D1 database, Turnstile spam protection, Resend email).

Hotel Supervisor

Oct 2024 – Dec 2025

Pomeroy Hotel and Conference Centre · Alberta, Canada

- Supervised daily operations and staff, maintaining service standards and guest satisfaction.

Professional Development

Aug 2023 – Sep 2024

Self-directed · Grande Prairie, AB

- Studied for and earned the AWS Certified Solutions Architect – Associate certification (Aug 2024), covering secure, resilient and cost-optimized architectures on AWS.
- Designed and built portfolio projects with Vue.js and React to apply full-stack and cloud skills.

Junior Front-End Web Developer & Cloud Practitioner (Apprentice)

Feb 2022 – Jan 2023

Generation USA · Remote

- Completed an intensive cloud computing and front-end development program covering HTML, CSS3, Sass, JavaScript, React, Git/GitHub, Linux and Python.
- Gained hands-on experience with AWS services including EC2, S3, RDS, ELB, VPC and EBS through individual and team projects.
- Worked in Agile teams, iterating on prototypes from usability testing and stakeholder feedback.

EDUCATION & CERTIFICATION

AWS Certified Solutions Architect – Associate

Aug 2024 – Aug 2027

Amazon Web Services

Diploma, Full-Stack Web Development

Jan 2023 – Aug 2023

InnoTech College · Calgary, AB
